tecpoles

poles are our passion

Welcome to Tecpoles

At Tecpoles, "poles are our passion!"

Welcome to Tecpoles, where we bring light into the dark and provide stability in a dynamic world. Our world is full of light, energy, and life, and we make it our mission to ensure that wherever you are, you can always count on having light, even when the day ends.

As one of Europe's leading manufacturers of lighting poles, catenary poles, and energy poles, we understand the importance of consistent quality, safety, and sustainability. That's why we use steel, a material that is both sustainable and safe, to manufacture our products.

At Tecpoles, we are committed to minimizing our ecological impact and focus on the lifecycle of our products, taking into account the customer's needs. We sell our products in over 70 countries and have sales offices in Germany, France, and Poland.

With over 125 years of experience, Tecpoles has four production facilities in Northern Europe, including factories for poles/masts/columns and brackets, as well as our own powder coating company in NRW, Germany. We also have other production locations worldwide for steel products such as high masts, telecommunications structures, advertising poles, lattice towers, structures for solar fields, and other structures and masts for airports, port areas, and industry.

Our passion and curiosity are what motivate us to consistently improve ourselves and define optimal solutions for our customers. We work hand in hand with our clients to ensure that we set the course for economic and mobility development and future.

Our national and international teams are ready to assist you with your projects and questions. Contact us today to learn more about how we can help you bring light, stability, and sustainability to your world.

PRODUCT RANGE

Evolution

In 2021 Tecpoles, with 360 employees and 4 production sites in Germany and Poland, became part of a larger group specialized in steel poles and other steel constructions. Within the group Tecpoles operates independently and serves the clients with its knowledge and service, while also more pole products are available now for its clients. Within the group there are 12 factories in EMEA and in the Americas producing different pole products. For Tecpoles, traditionally strong in lighting poles, catenary poles and energy poles, this means a wider stronger product portfolio to offer.

Lighting (Public & Urban)

Lighting (Commercial)

Tecpoles, "bringing light into your life!"

Traffic (signage, traffic lights, gantries & cctv)

Tecpoles, "guiding your way!"

Energy Poles / Powerpoles (low, mid & high voltage)

Tecpoles, "energizing your world!"

Smartpoles

Tecpoles, "charging your batteries!"

Industry, Port, Stadium, Airports & Advertisement

Tecpoles, "visibility from height!"

Passive Safety (protecpoles™ & road barriers)

Protecpoles, "engineered to save lives".

Traffic (urban mass transit)

Tecpoles, "making transport possible!"

Telecommunication

Tecpoles, "connects!"

Solar Farms / Renewables

Tecpoles, "creating the right energy!"

Engineering & knowhow

With an experienced large international team of engineers in the technical department, Tecpoles has the right static calculators, engineers, product designers and drafters to not only work on standard solutions for your projects, but also the more complex and demanding ones.

Tecpoles, "designing and engineering your project!"
